VOLUME 22

CLARESHOLM, ALBERTA, FRIDAY, AUGUST 27, 1926

## The Men's and Boys' Store

### Farmers and Harvesters

We carry a full line of Blankets for harvest at \$2.75 and up per pair.

Overalls, Underwear, Shirts, Shoes, Gloves, anything else you need, we can supply you at prices to suit your purse.

We appreciate your patronage in former years and hope to merit your confidence for this year.

We have made preparation to supply all your wants.

**C. J. BRAREN**

## Place your orders now for Wagons and Grain Tanks.

### Have car load Steel Trucks in stock.

**Frank Murray & Co.**

## Complete Threshing Outfit For Sale

One Case steam engine, 25-75 horse power,  
One Case separator, 36-56,  
in good condition, ready to put in the field.  
One cook car, furnished with range and utensils.  
One bunk car, room for twenty persons.  
One tender and truck.  
One new water tank and good wagon.

Will sell at a bargain for cash, or on time to good parties. The outfit can be inspected here at Clareholm. Call on us at our office.

**ARNESTAD BROS.**

## Now Is the Time

to have your harness repaired. Bring them on your next trip to town. Expert harness and shoe repairs. All work guaranteed. Our shoe repair department is up to date. We carry a full line of harness, saddlery, fancy leather goods, trunks and bags, shoe supplies, etc.

**J. T. KINGSLEY**

## Rex Theater

Friday and Saturday, Aug. 27-28

with Jack Holt, Billie Dove  
and Montagu Love

ALSO A GOOD TWO REEL COMEDY

## CLARESHOLM LOCAL NEWS

Mrs. Christstad is in the local hospital, very ill.

Clareholm schools will open on Wednesday, September 1st.

Born to Mr. and Mrs. Clarence Skoy, on August 16, a daughter.

T. D. Lewis is here from Pasadena, California, to spend several weeks.

Mrs. Chas. Ringrose and son returned on Tuesday evening from Ontario.

Miss Mary Walsh of Calgary was the guest of Mrs. A. D. McGregor this week.

There was a good turnout at the dance given here last Friday night by the Keene orchestra of Stavely.

The regular meeting of St. John's Ladies' Guild will be held on Wednesday, September 1, at the Parish Hall.

Mrs. G. R. Maxwell who has been in the Holy Cross hospital, Calgary, since July 5th, returned home on Thursday evening.

The first week in September Major School will proceed to the Livingstone Range, to be on hand during the sheep hunting season.

The first spring wheat threshed in this district was on the government farm, where some threshing was done on Wednesday this week.

W. Moffatt Sr. is in the Holy Cross hospital, Calgary, where he underwent an operation on Wednesday. He is reported progressing favorably.

Drilling for oil on the River Emmaus Oil & Gas Co. site at Alderside, a big flow of gas was struck at a depth of 200 feet. This makes the third gas well on the E. B. Bird farm.

At the Rex theater Friday and Saturday nights this week, James Oliver Curwood's "The Ancient Highway," with Jack Holt, Billie Dove and Montagu Love. This is a Paramount picture.

The Gas Company has applied to the Utilities Board for permission to raise the rate 10 cents per thousand feet in all towns and cities on the line. It is not at all likely that the company expects to get the raise.

Several days of hot weather the past week have hastened ripening of grain. Tuesday was the hottest day of the summer here, with a hot wind blowing from the southwest. Good progress has been made with grain harvesting during the week.

W. E. Gray, of the Canadian Western Natural Gas, Light and Power Company, was in town on Tuesday, selling stock in the company. This is considered gilded stock. It has recently taken a two per cent rise, and is shortly due for another rise. Any one desiring to purchase stock should write to Mr. Gray, care of the Gas Company, 215 South Avenue west, Calgary.

## Canadian Pacific Crop Report

The Canadian Pacific Railway's crop report for Alberta under date of August 23 says:

Since last report there has been considerable rain over practically the whole province, heaviest precipitation being reported in western and southern portions. Grass conditions and also filling of all late grains will improve as a result, but it has kept grain from ripening and real warm weather is needed. Little progress was made with harvesting, owing to adverse weather conditions and at present thirty to forty per cent of wheat in southern portion and fifteen to twenty-five per cent in central and northern districts has been cut. Taken all over the province, Alberta should have a better than average crop of wheat, but oats are not so good generally although recent rains should materially improve matters. With a favorable all season and no early frost conditions should be quite as good as last year. Fall on the night of the 26th did approximately five per cent damage to crop in the vicinity of Dayland, over a limited area.

## OBITUARY

George J. McKinney, 44 years of age, died at the Holy Cross hospital, Calgary, on Monday night from complications following a surgical operation. Deceased was born at Grand Forks, North Dakota. Coming to Canada 24 years ago, he spent eight years in Saskatchewan, eight years in British Columbia, and the past eight years in Alberta. For four years with his father he conducted a general store at this point, later being interested in wheat and fox farming here.

The late Mr. McKinney was a prominent member of the Clareholm Elks' lodge, being treasurer since its inception here.

Deceased is survived by his widow, one son, three daughters, his father, and a sister, Mrs. Farmer, of Trochu, Alberta, and a brother, Charles, residing in California.

The funeral took place Thursday, the service being held in St. Stephen's Catholic church, and conducted by Father Hughes. It was one of the most largely attended funerals on record in Clareholm. The members of the Elks' lodge attended in a body. As a mark of respect the business places of the town were closed during the funeral service. There were many beautiful floral tributes.

## Mother Seeks Wandering Boy

Down at Two Harbors, Minnesota, an anxious mother, Mrs. C. Y. Mayfield, sits waiting for the return of a foolish, young boy, aged fifteen years, who, lured by the glamour of the western picture, left home without letting her know where or how he was going.

Richard Mayfield, when last seen, purchased a ticket at the ticket office of the Duluth Winnipeg & Pacific for Winnipeg. He told that he intended to attend the "Stamper" at Winnipeg and was going to relatives in the harbor. Since his departure, Canada Nothing has been heard from him since that date and an anxious mother will appreciate information which will locate him. Richard is fifteen years old, five feet eight inches in height and weighs 135 pounds, light complexioned and generally wears his hair long and combed straight back, has blue eyes, wore a dark grey suit and light cap.

Coming from all parts of Great Britain and Ireland twenty-five thoroughbreds were unloaded from the Canadian Pacific line at Clareholm when it arrived in Montreal lately. They are for Muir's breeding and training ranch near Winnipeg, and comprise one mare, 16 mares and eight geldings. Nellie's Post, 3-year-old, by Cynos (Sire of winner of Section Derby last year) out of La Lie; and Denton, two-year-old, who comes of the same breeding as Coronach, winner of this year's English Derby, were among the horses arriving.

Captain Kilroy Harris, lecturer and radio talker in the United States on Australia and New Zealand, recently passed through Montreal on his way to the west where he will take part in the Trail Rides in the Canadian Rockies. He is already possessor of a silver medal for having completed 100 miles of trail rides and hopes this year to earn the gold medal, this testifies to the completion of 500 miles riding trails in that district. Capt. Harris is gathering material from Canadian sources for his lectures and radio talks.

## APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that Fred Collier and Thos. Moore of Clareholm have made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed road allowance lying south of section 4-13-26-W4.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of publication of this notice.

Dated at Clareholm this 6th day of August, 1926.

Fred Collier & Thos. Moore, Applicants.

## School Books

A large and complete stock of Text Books just received

We can help you to choose your books early so as to avoid the rush on the opening day.

A large assortment of scribbles, pencils, erasers, loose leaf books, fountain pens, etc., are at your command.

**FREE**—With each text book purchased, one book cover will be given free.

## Western Farmers Should Receive Higher Prices For Wheat On The Basis Of Protein Content

The protein content of Canadian wheat averages less than that of wheat from other countries that there should be even more price preference for the Canadian farmer than is now obtained, but it is doubtful whether such recognition will come so long as chemical analysis is not given definite weight in the established standards for wheat grading. Neither United States nor Canadian standards give a recognition to this factor, that results in increased return to the farmer producing extra fine wheat.

Protein content of the wheat constitutes an index of the gluten content in the flour. Flour with high gluten content is more nutritious, absorbs more water, and will make more loaf of bread per barrel. Since the United States has reached a point where bakers pay close attention to the chemical content of wheat material with the result that they are willing to pay premiums for better flour. When this was first realized, millers were able to pick up odd lots of good quality wheat in a particular grade without paying more than the average price for the particular grade. Now, however, the situation is changed.

A recent statement in "Wheat Studies" is to the effect that "the marked variations in the protein content of wheats of a given grade. Consequently, because of the importance of this factor in milling, the market price there is commonly a far greater range of prices for wheats of the same grade than of different protein content, and between average prices for adjacent grades."

To a great extent the farmer has failed to profit by this new criterion of wheat values because his wheat is sold almost entirely by standard grades. The dry climate of the west produces under conditions of high content both because of supermaturation and frequent loss of protein.

When wheat would receive more recognition under this new standard recognition of protein content as a factor in grading wheat will do much to aid many of the farmers who are now marginal producers and will also show the general farmer the quality of the wheat produced. In the long run, standardization of a type which gives full credit for quality, benefits the producer and consumer.

In line with the idea concerning the importance of emphasizing protein content is another suggestion pointing out the advantage of a policy of keeping low grade wheats for the feed market and using these grades for feed purposes. Not only do low grade wheats a disproportionately benefit effect upon the market, but they also tend to injure the reputation of the region from which they are derived. Strict maintenance of present standards has gone far to reward quality production, but because of the high quality of our wheat, further refinement of standards in terms of protein content will be particularly advantageous to Canada.

The province of Saskatchewan is particularly interested in this phase of the development of wheat production and marketing. It is a fact worthy of note, not sufficiently advertised, that Saskatchewan wheat has the highest protein content of any wheat produced in Canada, and the milling interests of the Dominion have a map showing the particular districts in this province where the high protein wheat is grown. South of the main line of the Canadian Pacific Railway and west of the main line, produces the largest quantities of this extra high-grade milling wheat. The importance of this to our farmers is self-evident. By concentrating on quality wheat production and establishing a Saskatchewan inspection system, and securing our wheat on the world's market as Saskatchewan wheat instead of the generalization of the northern provinces, it is possible that immediate benefit may accrue to our grain growers, particularly when the Hudson's Bay route is opened up, enabling our wheat reaching the markets of the world pure and unadulterated by low-grade mixtures. It appears that it would be given adequate recognition to the present inspection system as final. Under it our wheat producers are suffering a loss for the benefit of the Canadian grain crop as a whole.

—Moses Jay Thane.

### Trade With Bermuda

Canada should hurry and get her ships operating between British West Indies and Bermuda, under the new treaty, is the opinion expressed by Lieut. General Sir John Asher, governor of Bermuda, who in Montreal with Lady Asher, and the Hon. Mr. McCreedy was anxious to develop her trade with the Dominion.

W. N. L. 169

### The Feeding Of Chickens

#### Feed Containing Cod Liver Oil Found Of Great Benefit

Most satisfactory results are reported at Lennuville, Que., Dominion experimental station, feeding chicks with a commercial starting feed containing a percentage of cod liver oil. The feed is supposed to be fed dry in open troughs or feeders as an extra feed starting feed for the first two weeks of a chick's life. The superintendent of the station (Mr. J. A. McCarty) in his annual report, states that last year almost all the chicks were started on this starter meal and that the results were outstanding in the health of the chicks, there not being a case of leg-weakness or rickets and to twirling. Fresh water was always available and sour milk was gradually introduced after the fourth week of age. After two weeks of feed alternate feeds of a good scratch feed was scattered in a litter, which practice was continued until the chicks were around six weeks old, when they were gradually accustomed to coarser scraps, self-feeding hoppers and to twirling.

Excellent results were obtained from having a home-mixed ration of equal parts of wheat and cracked corn in equal proportion of the hopper and a dry mash of bran, middlings, cornmeal and a percentage of cod liver oil. The experiment was continued by Mr. McCarty, consistently giving this ration regarding the rearing of chicks. Do not feed until at least six weeks of age, have sufficient brooder heat to prevent crowding; feed every three hours a little at a time; rouse up the chicks in the morning and at night; supply plenty of fresh water in clean fountain; make all changes in feeding gradual.

### World Record For Milk

#### Quebec Bred Ayrshire Cow Holds Butter Fat Record Production

A Quebec-bred Ayrshire cow, Nellie Belle of Elmshide 16th, has broken the world's record for milk and butter fat production for the breed and also set a new record for the breed in 1924. The cow, which is owned by the late Mr. J. A. McCarty, produced 21,241 pounds of milk and 90 pounds of butter fat, surpassing the old Ayrshire record, held by an American cow, by 2,975 pounds of milk and 17 pounds of butter fat. The cow was 7½ years old when the test started a year ago, following a former official test during which she produced 22,566 pounds of milk and 90 pounds of butter fat. This taken with the record established this year, gives her an average of 22,955 pounds of milk and 95.2 pounds of butter fat for two consecutive lactation periods, which constitutes another world's record.

### The Keeping Of Eggs

#### "Guarantee" Process Eggs Found To Have A Better Flavor

A series of experiments conducted over two years has brought out several points, according to the report for 1924 of the Dominion poultry business, relative to the keeping of eggs, among which are: That eggs treated by the "Guarantee" process grade much better when taken out of storage and have a better flavor than those not so treated; that eggs should be stored with the small end down; that fresh-laid eggs are an important bearing upon their keeping qualities; that clean eggs keep better than either dry or washed eggs; and that cleanliness of dirt and filth is a point that should be observed. The experiments, excepting that referring to the "Guarantee" process, were conducted at Charlottetown, Brandon and Agassiz farms and stations.

### Cattle Exports Decline

Cattle exports to the United Kingdom continue to decline heavily. In 1924 the total number of cattle exported was 1,015, compared with 1,225 in 1923. The total shipments for 1925 up to date are 49,485 head, and for the corresponding period of 1924 57,222 head. At the same time the exports of cattle for this year were greater than for 1923 by 10,000 head. No net increase has declined down to less than 2,000 head.

### B.C. Fruit Crop

At a conservative estimate Sumnerland's fruit crop for the present year will be worth over \$100,000 more than the crop of 1925. The cherry crop, it is estimated, will be 50 per cent. better than last year.

### Tomato Growing In Saskatchewan

#### Method Adopted To Hasten Ripening Of Fruit

Last year was very favorable in some parts of Saskatchewan for growing tomatoes. At the Scott Dominion experimental station 345 pounds were picked on the vines before the first killing frost and 907 pounds were advanced were picked green, a large quantity of which ripened with a few days. The method of growing adopted was to plant the seed in boxes in the hot bed about the middle of April and reset about three inches apart when an inch or two high. When four or five inches high the glass was gradually raised for a greater time each day. After all danger of frost was passed transplanting was done, the plants being placed four feet apart each way and deep enough so that only one-fourth of the plant was above the ground. The plants were then beginning to bloom when transplanting. All the laterals were kept pruned, only the main stem being allowed to grow and this was tied to a support so that the tomatoes were out of the ground and exposed to the sun. In the superintendent's report for 1925 which was sent to the station from the Department of Agriculture, Ottawa, an illustration is given showing the method pursued to hasten the ripening of the fruit.

### Market For Cereals

#### Czecho-Slovakian Trade Pact Would Be A Boon To Canada

Should a trade agreement be reached with the Czecho-Slovakian Government, Canada would receive the benefit of a reduction amounting to almost 50 per cent. on her exports of cereals and wheat flour to that country, according to F. V. Kveton, consul-general of the Czecho-Slovakia Republic in Montreal.

The new tariff law passed by the Prague Government imposing duties of \$1.68 on wheat, \$1.14 on oats and \$1.42 on wheat flour per 100 lbs had been suspended until August 13. At that date the consul hoped that Canada would take advantage of the "most favored nation treatment" extended by Czecho-Slovakia. Under such a treaty the duties would be lowered.

### Immigration To Canada

#### Heavy Increase Is Shown In First Four Months of Present Year

A compilation of immigration to Canada for the first four months of the present year shows an increase of 81 per cent. over the first four months of 1925. The actual figures are 39,442 in 1926 and 21,776 in 1925. There have been increases in every month of the year ranging from 16 per cent. in January to 112 per cent. in March. For the first four months in questions British immigration increased from 19,119 in 1925 to 32,955 in 1926, from 4,772 to 5,797; and from other countries from 1,679 to 15,722.

When the economical housewife casts her stale bread into the waters her result is breadpudding.

### Honey From Canada

#### Makes Name Abroad

#### Chief Customers

Canadian honey is rapidly insuring itself a permanent market in Europe, especially Holland has recently become the chief purchaser of Canadian honey, and Germany next. The export figures for the eleven months ending February, 1926, are: Netherlands, 60,000 pounds; Germany, 45,000; United Kingdom, 27,000 pounds; United States, 25,000 pounds; Denmark, 14,000 pounds; all others, 26,000 pounds.

Ontario and Quebec have hitherto been the chief beekeeping areas of Canada, but the western provinces are rapidly developing up-to-date apiaries. The western provinces will soon be in a position to supply their own markets, and probably at a somewhat later date the Maritime provinces also, while Quebec, Ontario and possibly British Columbia, have sufficient surplus to justify the development of permanent markets abroad.

### To Dominate Clover Seed Market

#### British Columbia To Undertake Extensive Cultivation Of Clover

British Columbia expects to dominate the Canadian clover seed market as a result of the reclamation project in and around Sunas Lake. This body of water was recently drained by provincial authorities, leaving a valuable tract of land, which will be opened up by a system of roads and offered for sale. In the meantime the government has experimented in growing clover seed, probably of the red variety, though a recent report in the Victoria Times does not specify the particular kind.

A field of 500 acres will be harvested at this fall, the yield, it is expected, running around eight bushels per acre. Next season 5,000 acres of government land will be ready to harvest. The provincial minister of agriculture, Hon. E. D. Barrow, confidently expects to make a profit of \$100 per acre, and to have enough clover seed next fall to supply the whole domestic market without importing.

### Registered Seed

#### Order Placed In Saskatchewan For About Fifteen Carloads

An inquiry for a quotation of 500 tons of registered Saskatchewan Marquis wheat has been received from a British firm by the Saskatchewan Registered Seed Association. This quantity represents 16,000 bushels, or about 15 carloads, and it filled will be the largest commitment yet sent from the province. Substantial orders for registered seed wheat and other grains have been filled by the association for Argentine, United States and Canadian buyers in the last twelve months.

### A Helping Hand

Irate Parent—"Till" teach you to make love to my daughter, eh?" Young Man—"I wish you would, old boy, I'm not making much headway."

## Landing Fields In Mid-Ocean Are Proposed By Engineer For Trans-Atlantic Air Line

### Swarm Detection

#### New and Easy Method of Locating Queen Cells

A method of doing away with the need of going through a colony and examining every comb for queen cells is described by Mr. W. S. Blyth, superintendent of the Kenilworth, N.S. Dominion experimental station, in his last report. In the two outapiaries consisting of sixteen colonies, he says a shallow tray is left on each colony the entire year. In the winter and spring these serve of purpose of a food chamber and in the active season as a brood chamber. At Bridgetown, additional supers given these colonies during the season have placed over a queen-excluder. Mr. Blyth states that of the fourteen overwintered colonies only two in the two-outapiaries developed queen cells, all of which were along the bottom bars of the frames in the shallow supers.

By the method here described any queen cells that may be present can be detected by lifting one end of the shallow super and looking along the bottom bars of the shallow frames.

### No Poison On Apples

#### Canadian Apples Not Affected By Spraying Methods

Following cables reports from England of arsenical poisoning from eating imported apples, Dr. Frank P. Stuart, D.Sc., Dominion chemist, produced for analysis 43 samples of unblemished sprays apples from the chief apple exporting districts in Canada in Nova Scotia, Quebec, Ontario and British Columbia. Examination showed that approximately one-half the samples were entirely free from arsenic and the greatest amount found was slightly in excess of one-two hundredths grain per pound.

At this rate it would require one dozen apples of average size to supply the minimum medical dose and four dozen apples to supply the maximum dose.

### Canadian Cattle For New Zealand

#### Buyer From Antipodes Purchases Cattle from Various Parts of Canada

W. J. Chynoweth, former director of the Day of Plenty Dairy Association of the North Island, New Zealand, has been visiting the dairy districts of Quebec, Ontario, and the western provinces to purchase dairy cattle. He has secured some very fine Jersey from various sections. He states that importations of Canadian cattle have contributed greatly to the improvement of stock in New Zealand and that the Canadian animal has no superior. Canada, he says, offers fruitful prospects for buyers from New Zealand.

### Plenty Of Land Available

#### Cheapest Land With The Highest Yield Can Be Had In Western Canada

According to cable advice the governor of the Hudson's Bay Company, speaking at the annual meeting of the company, stated that there still remained in the possession of the company 2,119,000 acres of land in the prairie provinces. He pointed out that the present price of land there was lower than that of similar land in any other part of North America despite the fact that the average tax on land was lower in Canada than in the United States and the average yield of spring wheat was higher. This, he said, was the great inducement Canada laid out to the immigrant farmer—the cheapest land with the highest yield on the North American continent.

Soon he will display to army and navy officials, representatives of large shipping concerns and experts in the field of commercial aviation, a model of the aerodrome and a model of the 88.5 mile long trans-Atlantic air line, Armstrong holds the speed and carrying capacity must be sacrificed. Hence he proposes eight mid-ocean stations where refueling may be effected.

Soon he will display to army and navy officials, representatives of large shipping concerns and experts in the field of commercial aviation, a model of the aerodrome and a model of the 88.5 mile long trans-Atlantic air line, Armstrong holds the speed and carrying capacity must be sacrificed. Hence he proposes eight mid-ocean stations where refueling may be effected.

### Green Cabbage Worms

#### Poison Spray May Be Used As A Remedy

During the late summer and autumn green cabbage worms, which are the caterpillars of the white cabbage butterfly, destroy large numbers of cabbages by nibbling the leaves and heads of the plants. The butterfly is very common in gardens, where they can be seen depositing their eggs on the leaves of cauliflowers and turnips in addition to cabbages. Poison spray may be used as a remedy until the heads are nearly formed. A good non-poisonous remedy is fresh preparation of DDT, which may be used in four parts of cheap kerosene and kept in a tight vessel for twenty-four hours before using. The mixture may be applied from a duster, sold by seedsmen, or from a device cloth bag made for the purpose, or the bag over the plants and tapping the stick with a cane held in the other hand as he walks along the rows.

## Calgary Stampede A Big Success

Lower—Ready to contest for the honors of their tribe. Upper—Jogging the bucking contest.

The Calgary Stampede was unique in Canada, in that it was not professional. The animal owners, animal stock-wagon and work horses from the ranches in the district were the performers. In other words, this stampede is "the real thing" in a ranching territory, where every kind of thrilling sport known to the west is participated in by genuine westerners. It is described

as a gigantic celebration, staged on its own grounds, by a western community. There are very few such events in America or even in the world.

### Backward In This Respect

A pal in China sends me an amusing yarn about Lord Wellington, Lord Blyth's successor as Governor-General of Canada. His lordship, who has extensive knowledge, was asked seriously by an eminent Chinese diplomat why the English Government didn't settle his labor disputes with machine guns. "We are a very backward race in this respect," answered Lord Wellington, "but there is compensation. We are still with a strong race, please don't judge us too harshly."—London Mail.

Harriet sat telephoned, "Oh, Charles, do come home. I've missed the plugs in some way. The radio is out of control with them and the radio box is being 'Moonlight and Roses'."

## Mr. Farmer

Now is the time to get your wagon fixed for the big harvest. I carry a full line of wagon eveners, poles, reaches, axles, bolsters, log chains, etc. Get your tires set before the big rush.  
V. Norgard.

## J. HERMEN BOUSQUET CONTRACTOR

Get your cellar done water-proof. I build cisterns and guarantee them to hold water.

### A FINE BATHROOM

Modern fixtures have another advantage—they are easier to keep clean than the old-fashioned kind. Those beautiful smooth white surfaces can be kept in a glossy condition with very little care—and there are no difficult corners where only an acrobat could hope to clean successfully. Drop in and see our display of bathroom fixtures.

## Stomach So Bad Can't

Even Eat Fruit

"For years was badly constipated and troubled with gas after eating. Could not eat fruit and many other things. Adlerika has done me good—can now eat anything." (signed) W. H. Fletcher.  
Adlerika removes GAS and often brings astonishing relief to the stomach. Brings out a surprising amount of old waste matter you never thought was in the system. Stops that full bloated feeling and makes you enjoy eating. Excellent for chronic constipation. Clareholm Pharmacy.

## C.P.R. Opens Public Golf Course

CLUB HOUSE

situated.  
"Langara" Golf Course extends over 100 acres of gently undulating land, and the aggregate length of 18 holes is 6,000 yards with a par of 74.  
There is a fine club house on the grounds, which cost \$12,000 and is splendidly equipped throughout with a dining room, dressing room, shower baths and lockers.  
But the most interesting feature of the new South Vancouver course is that it is public, and thus within the reach of the man of moderate means. A full round of 18 holes costs only 50 cents, with monthly or yearly rate of \$2.50 and \$50 respectively.  
"Langara" is said to be very similar to the famous "Westward Ho" course near Bideford, Devon, England, and is only four miles from the heart of Vancouver City.

WORLD HAPPENINGS  
BRIEFLY TOLD

The man in Reading, England, whose radio loud speaker can be heard by his neighbor will be liable to a fine of \$25.00.

Capain Pictet, a Rumanian of Rer, faces trial by a special court martial because he shipped William R. Calhoun, American minister in Rumania.

Samuel Scott, a pioneer of the west who for many years was associated with the agricultural interests of the country and was a prominent member of the Winnipeg Grain Exchange, is dead.

Representatives of Vancouver will vote some time next October on the \$1,000,000 bonus for carrying out the proposed electric scheme. The greater part of the money will be required for expropriation of private property.

Two more Canadians who had been already appointed judge councillors, have been sworn in at the city court held by His Majesty. They were Hon. Francis Anglin, chief justice of Canada and Rt. Hon. George Perry Graham.

Rich. Quilleyman, reported to be 101 years of age, and the oldest Indian in British Columbia, died suddenly at his home on the Esquimalt reserve.

Robert Alexander, a well known advertising man and president of the Beker Advertising Agency, Toronto, is dead.

Twenty-nine persons are dead and four are blind from poison liquor in Buffalo and nearby New York and Eastern Canadian cities. Thirteen of the dead are from Buffalo. Three more died at Lockport. The other thirteen died in cities on the Ontario peninsula.

An increase of \$11,112,142.93 or 26.69 per cent. in the net earnings for the first six months of 1928 as compared with the same period of last year is shown in the financial statement of the Canadian National Railway for the period January 1 to June 30, 1928.

Recent dismissal of colored waiters from the Canadian National Railways dining car service was protested at a gathering at a meeting held in Toronto under the joint auspices of the United Negro Improvement Association and the Canadian League for the Advancement of Colored People.

## 60,000 Harvesters Wanted

Army of Harvesters Required to Garner the Crop on Prairies.

It is estimated that 60,000 extra men will be required to garner the harvest in Western Canada this summer. This army of harvesters will be drawn from the provinces of Eastern Canada, British Columbia and the United States. It is understood that Saskatchewan will need 25,000 men, Manitoba between 8,000 and 9,000 and Alberta about 12,000.

From points both east and west toward the three prairie provinces of Manitoba, Saskatchewan and Alberta, specially low railway rates will be available to certain of the provinces of Western Canada for those going to work in the harvest fields. Return tickets will be issued at reduced rates to harvest hands providing they have worked at least a month on farms in Western Canada.

## Was Original Peter Pan

The Boy Who Never Grew Up Now?

"Peter Pan," the boy who never grew up, played quite a grown-up part in the world recently.

Peter Huxley Davis, the original of Sir James Barrie's Peter, acted as best man at his brother's wedding in Kent, England. James also attended the ceremony.

"Peter Pan's" brother is Nicholas Huxley Davis. He is married to the Honorable Mary James, daughter of Lady Northcliffe. He is one of Sir James' wards.

The big Medicine Hat plant of the Canadian Western Steel Corporation, which has been idle for some years, has been purchased by the United States Steel Corporation.

Many Hospital Beds.

A hospital census of Canada reveals the fact that there are 28,576 hospital beds in the Dominion. Of this total 2,670 beds are available for maternity patients. The census also shows that there were 28,621 births in hospital in Canada in 1927.

## Gandhi Would Reform India

Tells What Measures He Would Take If He Were Emperor

"If I were Emperor of India," Mahatma Gandhi, the great Indian nationalist leader, said, "I would prohibit the importation of intoxicating liquors and close down every distillery. I would summon the representatives of both Hindus and Moslems, search their pockets and deprive them of all watches and weapons, and then open it only after they had settled their quarrels."

"I would extend the hand of fellowship to the whole world, irrespective of caste, color or creed; I would disband the entire army of occupation in India, retaining only enough police to protect the citizens; I would guarantee full protection to every European as well as all honest European enterprises; I would guarantee protection to all forms of religious worship, except that which is repugnant to the moral sense of mankind; I would not bribe the frontier tribes as they are now being bribed, but would cultivate their friendship, and I would impose a prohibitive tariff on all foreign cloth."

## Hearts Of Oak

British People Never Shook Higher In Respect and Confidence of the World

The British as a people have never stood higher in the respect and confidence of the world. If they were not so steady as a rock through the storms and troubles crowding upon them in home and foreign and imperial affairs, the world would be a different place. The British people have shown a courage and a confidence that has won the admiration of all eyes. In the eight years of the Armistice we are still holding front, despite anxieties, disappointments, crises, and even coming one at a time, but after beating us at all quarters together in a way that might have been the least of our troubles, we have won a great victory. A. J. L. Garvin, in London Observer.

## Manitoba Dairy Industry

Growth in Recent Years Has Been

The growth of the dairy industry in Manitoba was recently summed up by L. A. Gibson, dairy commissioner for the province. In 1912, according to his statement, between 50 and 60 carloads of butter were shipped into the province from Ontario and Quebec. In 1913 imports were 35 carloads and in 1914, 20 carloads. In 1915 Manitoba produced enough butter to meet market requirements and also shipped out of the province 20 carloads. This has been increasing each year until in 1927 the province has produced and exported 25 carloads valued at 2,500,000.

## Activity in Building

Encouraging State of Conditions in Canada Generally

Building has never been so active in Winnipeg than it is at present. For the first six months of this year the total value of building permits was \$5,200,000 compared with a total of \$2,123,000 for the similar period in 1925.

This activity in building in Winnipeg and also in many other places throughout Canada is indicative of the encouraging state of conditions generally in the Dominion. With the prospects for another good grain harvest this year, farmers and business men in Canada are feeling optimistic.

Women Enter Legal Profession

Five more women have been called to the bar in London, indicating that an increasing number of them are taking up the legal profession as a means of livelihood. Among the latest to do the wig and gown the English bar are the Hon. Ruth Buckley, daughter of Lord Weymouth, and Miss Bessie Hing Lim, of Penang, Straits Settlements. Miss Bessie is the second Oriental woman to be called to the bar. Her brother, Kwei Sing Lim, also has been admitted to the profession.

## British Use Dollar Sign

Dollar signs on goods have appeared for the first time in the shopping districts of London, frequented by American tourists. The marks, quite easy to see, are London made, as they are from money made by the Bank of England, and lack the original Yankee dollar.

Caracul coats are killed when they are only a few days old, before the cut of their fur becomes, in order to produce Persian lamb and Astrakhan.

Palminers possessive time the same way that amateur anglers fish—(from tip to tip)

IDEAL  
Fashions  
For the  
Fashionable

## A Sports Frock of Practical Design

Fashion tells us that sports frocks have assumed a predominant place in the wardrobe, their simple and practical lines fitting in perfectly with the requirements of our active, everyday life. The discriminating woman might well choose the two-piece model shown here for its simple, clean lines. The blouse slips on over the head and has a plain collar to be worn high or low. There are five guthers at each side of the hips and long set-in sleeves are finished with tailored cuffs. A tie of polka-dot crepe is worn under the collar, the ends passing through two bound buttonholes. The bodice and skirt have a cluster of plaits in the centre of the back. Plain. The blouse No. 1024 is in size 34, 36, 38, 40 and 42 inches bust. Size 36 requires 25 yards 27 inch material. Size 38 requires 26 yards 27 inch material. Size 40 requires 27 yards 27 inch material. Size 42 requires 28 yards 27 inch material. Price 20 cents each frock. 25 cents each frock.

Our Fashion Book, illustrating the newest and most beautiful styles, will be of interest to every home dressmaker. Price of the book 10 cents the 25p.

## Telephones in Canada

New Takes Second Place Among

According to recent statistics Canada, with 11.6 telephones to every hundred of her population takes second place among the countries of the world. The United States which has 112 telephones to every hundred people, followed come Denmark, Sweden, 87.8 Sweden, 63; and Norway, 61. In Great Britain there are only 2.8 phones to each hundred of the population and in France 1.7.

## Lincoln's Son Is Dead

Robert F. Lincoln, only surviving son of President Abraham Lincoln, was found dead in bed at his summer home in Vermont. Mr. Lincoln, who had served as secretary of war, minister to Great Britain and for years president of the Pullman Company, which late had been feeble in health, was 52 years old.

Reunited After Twenty-One Years

A most interesting reunion which took place on the Canard Enchaîné, a mocket of Quebec last week, was when Mr. Harold Taylor, well-known boxer for the C.N.R. in Winnipeg came aboard and met his mother, who was one of the passengers. Mrs. Taylor had not seen her son for 21 years. The picture above Mr. Taylor is shown on the left, while on the mother's left is her grandson, whom she had never seen.

## Survey Of Unoccupied Land

Manitoba Government Taking Agricultural Survey

The Manitoba Government has commenced an agricultural survey of unoccupied lands in the province which when completed will provide the incoming settler with all available information on such lands. A total of 2,474 homesteads have been taken up in Western Canada this year. In addition 67 families consisting of 1,633 persons have come to the western provinces under the Dominion settlement scheme. The Canada Colonization Association has placed 613 families in the west during the past year. All present immigration records were broken last year when 1,681 immigrants passed through Winnipeg in forty-eight hours.

## To Manufacture Automobiles

Engineering Firms in Australia Endeavor to Establish Industry

Four large engineering and electrical engineering manufacturing concerns in New South Wales are planning to form a company capitalized at £1,000,000, to produce Australian-made motor cars. They intend to build a 35-cylinder type car suited for Australian conditions, and apply in its manufacture the latest production system. Representatives of these firms have approached the Australian Government with the suggestion of a subsidy to aid the new industry. The ministers of trade and customs promised that any reasonable recommendations would be sympathetically considered by the cabinet. Australia is the largest importer of U. S. automobiles.

## Frenchman Invents

Bicycle That Flies

Machine Can Be Transformed Into a

A young French mechanic in a factory at Dijon has just invented a bicycle that flies. According to a report received in Paris the Frenchman has been working on his invention several years and has finally completed successful tests. The bicycle can immediately be transformed into a small motor plane and fly to a height of 520 feet. The inventor conducts without mishap and the mechanic intends to present his invention to the public.

The successful manufacture of the bicycle in large quantities will make flying within the means of all, in the opinion of the inventor.

## Rare Paintings Stolen

Merchant Plunders Castles in France By Ingenious Method

Valuable old masters for centuries American collectors of rare paintings found their way into the Paris art gallery market by a trick which has placed the dealer behind the bars. The French merchant, who is a highly specialized antiquary and an artist of some ability made copies of the paintings in private galleries. After carefully "enveloping" the copy he calmly carried away the original work of art and left his substitute found their way into the Paris art gallery market by a trick which has placed the dealer behind the bars.

Coolidge May Not Run Again

Senator Cummins Makes Prediction in Interview

That President Coolidge will not be a candidate for reelection in 1928 was one of the predictions made by Senator Albert B. Cummins in an interview. "One doesn't know that President Coolidge will be a candidate or that he wants to be a candidate. My own prediction is that he will not be a candidate. I think he will have had enough of it by that time. It is an immense task and few men last through it."

"I think Mr. Coolidge has been a very successful president in his own right," said the senator, "and that his policy toward agriculture."

Auxiliary Lungs

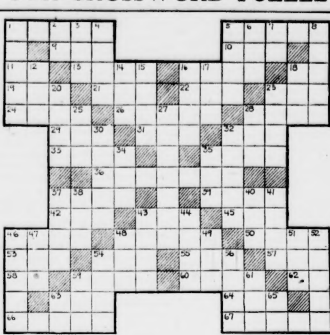

Artificial Lungs Provide Air Pilots With Oxygen For High Altitudes

Auxiliary lungs enabling aviators to reach unprecedented heights, are said to have been perfected by a French chemist, M. Garasus. The Academy of Sciences regards this invention as one of the most important in the selection of aviation in recent years. Artificial lungs, adjusted to a standard, provide pilots with increasing amount of oxygen as the plane climbs. Experiments have shown that a pilot can stand unlimited heights, are said to have been perfected by a French chemist, M. Garasus. The Academy of Sciences regards this invention as one of the most important in the selection of aviation in recent years.

Platoes For California

Arrangements for the export of large quantities of British Columbia seed potatoes to California have been made this year by a potato grower of that state. The British Columbia potato industry is looking for a new strength into the southern state. Experiments were made with Canadian potatoes last year in California. In growing seed potatoes for export and growers were well satisfied with the results.

# Sweep Up hill in the Smooth Chevrolet

FROM a movement almost imper-  
ceptible—through easy, quick accel-  
eration—to a thrilling display of speed  
—all with unbelievable ease and  
smoothness—Chevrolet suits severely  
over the hardest hills.  
To the restless power and supreme  
economy of the Chevrolet engine has  
been added a smoothness—a freedom  
from vibration—unsuspected and hith-  
erto unknown in a four cylinder car.  
Never before was even Chevrolet cap-  
able of establishing such performance

with such evident ease and smoothness.  
Compare the smooth Chevrolet—not  
done with care in its price class—but  
with cars more expensive, more costly  
of upkeep, more difficult to handle.  
Chevrolet welcomes any test or com-  
parison you care to make.  
The Smoothest Chevrolet in Chevrolet  
history is selling at the Lowest Price  
for which Chevrolet has ever been sold  
in Canada.

farm; must be fully equipped  
Address Box 14, Salford, Alta.

Ford One Ton Truck  
equipped with grain  
body and all steel  
closed cab.

## Ford Truck Does Work Of Six Teams

When one man with a Ford Truck  
can haul as much grain to market  
each day, as six men with six teams,  
it is not difficult to figure out an enor-  
mous saving per bushel in marketing  
costs.

This is the experience of Simon Henry  
of Edwina, Manitoba, who says "I  
believe the Ford truck to be one of  
the best pieces of farm equipment I  
have on the place, and the proper meth-  
od of getting grain to the elevator."  
A full box of wheat averages from 50  
to 55 bushels. The round trip aver-

ages 22 miles and the Ford truck  
averages 8 loads a day. "Our largest  
day's work," says Mr. Henry, "was  
about 500 bushels from granary to the  
elevator, one man shovelling his own  
load on the truck."

The average gasoline consumption,  
according to Mr. Henry, is a gallon to  
fourteen miles over heavy roads.

Farmers who have experienced this  
speedy marketing with Ford trucks  
would never consider going back to  
the slower teams which tie up labour  
for many hours on the road.

We will gladly prove to your satisfaction that the  
use of Ford equipment will save you time and money.

## Patronage Dividend Payment

One Cent Per Bushel

A Patronage Dividend of one cent per bushel is be-  
ing paid on street grain purchased by United Grain  
Growers Limited during the past crop year.

Holders of patronage dividend receipts should pre-  
sent them to be cashed at elevator where street grain  
was delivered.
